

## WELCOME PACKET FOR A FEMALE INDIVIDUAL

Thank you for choosing the Family Fertility Center for your fertility care. We take great pride in operating as a team to provide quality health care to all of our patients and, ultimately, to help our patients realize their dream of having a child. Included in this packet for a **FEMALE INDIVIDUAL** are:

- Directions to the Family Fertility Center
- Forms to be completed and brought with you to your appointment:
  - New Patient Demographics Form
  - Your Financial Responsibility Form
  - Pharmacy Benefit Pre-Verification Form
  - Patient Communication Instructions
  - Receipt of HIPAA Notice (female)
  - Insurance Coverage for Laboratory or Radiologic Testing
  - Preconception Carrier Screening
  - Questionnaire for Women
- Other documents required at first visit:
  - Valid drivers' license or state-issued photo ID for both partners
  - Health insurance cards for both partners
  - Prescription cards for both partners
  - Referrals/pre-authorizations as may be required by your insurance, whether primary or secondary. Call the customer service number on your insurance card for assistance in determining if you will need a special referral.

NOTE: All patients having **Aetna** insurance -- either primary or secondary -- must call the infertility hotline to enroll in the infertility program and/or obtain a pre-authorization. Please call 1-(800)575-5999 to enroll in Aetna's program.

Please take a few minutes to complete these forms, particularly the medical information forms. It is important that you provide as much detailed history as possible to your doctor during your initial consult.

If you already have undergone a basic infertility workup, or if you have had infertility treatment elsewhere, please request copies of those medical records and bring them along to your initial consult. A **Patient Request for Medical Records** form also is available at this website for your convenience.

If your insurance requires any special referrals or preauthorization for infertility, please bring it with you to your initial consultation. Also confirm if ultrasounds and hormone blood tests can be performed in the specialist's office. If not, what is the name of the specific radiology facility or laboratory you must use?

### Directions to Our Office

Go to [www.familyfertility.com](http://www.familyfertility.com) Home page> Becoming a Patient>To Schedule a Consultation > Directions to the Family Fertility Center.

## **Keeping your appointment**

Last minute delays or schedule conflicts happen. Our team will greatly appreciate a courtesy call to keep us informed. We will give our best effort to accommodate reasonable delays or we will be glad to reschedule your consultation at another mutually convenient time.

## **Your First Visit**

At your first visit, a careful review of the woman's medical history including past and current health condition will be undertaken. This can include:

- A review of the pattern of menstrual cycle and bleeding to help determine if ovulation is occurring and if other problems such as diminished reserve (aging) of the ovary or uterine defects (fibroids or polyps) are present.
- A review of past pregnancies and outcome.
- Collection of information which might suggest an anatomic problem with the tubes, such as questions about past history of sexually transmitted infections, painful periods or intercourse, and/or a previous abdominal surgery.
- Questions about prior freezing or surgery to the cervix for abnormal pap smears.
- A general review of systems to ascertain symptoms suggestive of other endocrine abnormalities which might be contributing to infertility.
- A careful social history to evaluate for any environmental exposures or social habits (such as smoking, drinking alcohol, drug usage or extreme exercise) which could contribute to the infertility.
- A detailed family history to identify possible familial diseases such as uterine fibroid, diabetes, thyroid disease, ovarian cancer and breast cancer.

A physical examination, a pelvic ultrasound, and/or hormone blood tests may be performed at your first visit to evaluate the pelvic organs and assess potential hormonal problems. In some cases, your insurance may require you to have these tests performed at an outside facility. Also please check with your insurance to determine if any special referrals or authorizations are required if these tests are performed in our office.

Any medical records you may have related to previous infertility evaluation or treatment will be reviewed to define the cause of your infertility, evaluate the effectiveness of past treatment and, assess how that information may impact your future treatment options.

We look forward to meeting you. Should you have any questions in the meantime, please feel free to call our office at (610)868-8600.

**Thank you.**

**YOUR FINANCIAL RESPONSIBILITY**

**Having insurance is not a substitute for payment.** Family Fertility Center (FFC) cannot guarantee payment of claims by your insurance company. At all times, patients are responsible to advise FFC of any and all changes in insurance coverage. You are responsible for knowing the terms of your benefit plan and making sure all action is taken by you in order to ensure optimal reimbursement, including, but not limited to, obtaining referrals and/or pre-authorizations, appealing denials, etc. If FFC participates with your insurance plan, claims for covered services will be submitted directly to your insurance. You are responsible for paying co-pay, co-insurance, and deductibles at the time of service. It is the patient's sole responsibility to appeal any denied charges. Payment for any denied charges, regardless of rejection reason or appeal status, is due within 30 days of receiving your insurance (EOB) Explanation of Benefits or FFC statement. If FFC does not participate with your insurance plan, or if services are not eligible under your insurance plan, you will be responsible for paying all charges prior to services being rendered by FFC or, if credit is extended, within 30 days of receipt of your insurance EOB or FFC invoice. Any unpaid patient balances remaining after 90 days will be forwarded to an outside agency for collection and/or may be reported to the Credit Bureau as a bad debt without further notice to you. Any and all costs incurred (attorney fees, collection expenses of 33.3%, etc.) to collect any unpaid balances will be payable by you. All terms and payment agreements are subject to credit approval, and a credit report may be retrieved without further notice to you. While we do reserve the right to waive payment in the event of financial hardships or based on individual consideration, any payment waiver and/or reduction will be made at our sole discretion and is not to be construed as an agreement or contract to reduce/waive any or all fees.

**I/WE, THE UNDERSIGNED, HAVE READ THIS INFORMATION, UNDERSTAND IT, AND AGREE TO BE FINANCIALLY RESPONSIBLE IN ACCORDANCE WITH THE TERMS SET ABOVE.**

**Insurance Coverage for Laboratory or Radiologic Tests**

**What are laboratory or radiologic tests?**

Laboratory tests typically involve blood test, urine analysis or test on tissue biopsy. Most common radiologic tests are X-ray, ultrasound, CAT scan or MRI.

**Why are laboratory or radiologic tests necessary?**

Laboratory and radiologic tests are necessary to screen you for certain disorders you are at risk for, to find out why you have certain symptoms, and to evaluate if you respond well to a particular treatment.

**What tests are ordered for me?**

Family Fertility Center follows prevailing standards of care regarding what tests are medically indicated for our gynecologic patients as well as patients with infertility. These tests include but are not limited to screening for cervical cancer such as Pap smear and HPV testing; screening for sexually transmitted diseases, STD, including HIV; pre-conception screening for cystic fibrosis and other genetic diseases for all reproductive age women; genetic disease testing and chromosomal analysis for certain medical conditions; and ovarian reserve testing such as anti-Mullerian hormone, AMH.

**Does my health insurance cover the cost of laboratory or radiologic tests?**

Even though a test is medically indicated and recommended by prevailing standards of care, it may or may not be covered by your insurance. Family Fertility Center makes no guarantee that your insurance will cover any test.

**Can Family Fertility Center find out for me if a laboratory or radiologic test is covered by my insurance?**

Your health insurance is a contract between you and your insurance company. It is your responsibility to contact your insurance company to find out whether a particular test is covered by your policy and how much you should expect to pay.

**What should I do if I am concerned the test is not covered by my health insurance?**

You must voice your concern to the staff at the Family Fertility Center and request to opt out of any or all of the medically indicated tests **BEFORE** the test is performed.

**PLEASE SIGN BELOW TO INDICATE WHETHER YOU WISH TO PROCEED WITH OR OPT OUT OF ANY OR ALL LABORATORY OR RADIOLOGIC TESTING**

[  ] I agree to **PROCEED** with laboratory and radiologic testing as indicated by prevailing standards of care\*. I understand I am responsible to contact my insurance company to find out if a particular test is covered by my insurance policy and my expected out of pocket expense.

[  ] I wish to **OPT-OUT OF ALL** medically indicated laboratory and radiologic testing until further notice. I understand by declining laboratory and radiologic testing, my medical care is compromised because such tests are necessary to screen for certain diseases I am at risk for, to find out why I have certain symptoms and/or to evaluate if I am responding well to a particular treatment.

[  ] I wish to **OPT-OUT OF ONLY THE TEST WRITTEN BELOW** until further notice. I understand by declining laboratory and radiologic testing, my medical care is compromised because such test is necessary to screen for certain diseases I am at risk for, to find out why I have certain symptoms and/or to evaluate if I am responding well to a particular treatment.

Name of laboratory or radiologic test opting out \_\_\_\_\_

\*Family Fertility Center makes no guarantee any or all of the laboratory or radiologic testing is covered by your insurance company in spite of prevailing standards of care. **It is your responsibility to contact your insurance company to find out whether a particular test is covered and your expected out of pocket expense. You are responsible for the cost of any or all of the laboratory or radiologic testing not covered by your insurance.**

**Patient Signature:** \_\_\_\_\_ **Date:** \_\_\_\_\_

## **Preconception Carrier Screening**

Modified in part from ACOG: Preconception Carrier Screening  
<https://www.acog.org/Patients/FAQs/Carrier-Screening>

### **What is preconception carrier screening?**

Preconception carrier screening is a type of genetic test you can have before pregnancy that can tell whether you carry a gene for certain genetic disorders. It allows you to find out the chances of having a child with a genetic disorder.

### **What is a carrier?**

For some genetic disorders, it takes two genes for a person to have the disorder. A carrier is a person who has only one gene for the disorder. Carriers have no or mild symptoms but can pass on the gene for that disorder to his or her child.

### **Who should have carrier screening?**

All women who are thinking about becoming pregnant are offered carrier screening for cystic fibrosis, thalassemia, hemoglobinopathies, and spinal muscular atrophy. You can have screening for additional disorders as well. There are two approaches to carrier screening for additional disorders: 1) targeted screening and 2) expanded carrier screening.

### **What is targeted carrier screening?**

In targeted carrier screening, you are tested for disorders based on your ethnicity or family history. If you belong to an ethnic group or race that has a high rate of carriers for a specific genetic disorder, carrier screening for these disorders may be recommended. This also is called ethnic-based carrier screening. If you have a family history of a specific disorder, screening for that disorder may be recommended, regardless of your race or ethnicity.

### **What is expanded carrier screening?**

In expanded carrier screening, many disorders are screened for using a single sample. This type of screening is done without regard to race or ethnicity. Companies that offer expanded carrier screening create their own lists of disorders that they test for. This list is called a screening panel. Some panels tests for more than 100 different disorders. Screening panels usually focus on severe disorders that affect a person's quality of life from an early age.

### **Is one approach better than the other?**

As of 2017, the American College of Obstetricians and Gynecologists (ACOG) recommends either approach is acceptable. But for individuals with a specific family history or ethnicity for certain genetic disorder, a targeted carrier screening would be more appropriate.

### **Do I have to have carrier screening?**

Carrier screening is a voluntary decision. You can choose to have carrier screening or not. There are no right or wrong choices.

### **How is carrier screening done?**

Carrier screening involves testing a sample of blood or saliva. The sample is sent to a laboratory for testing. Often the partner who is most likely to have a defective gene is tested first. If test results show that the first partner is not a carrier, then no additional testing is needed. If test results show that the first partner is a carrier, the other partner is tested.

### **Does preconception carrier screening test for all genetic disorders? What carrier screening tests are available?**

Carrier screening tests do not detect all genetic disorder. Carrier tests are available for a limited number of diseases, including cystic fibrosis, fragile X syndrome, sickle cell disease, and Tay-Sachs disease. As of 2017, the American College of Obstetricians and Gynecologists (ACOG) recommends carrier screening for cystic fibrosis, spinal muscular atrophy, thalassemia and hemoglobinopathies be offered to all women who are considering pregnancy or are already pregnant regardless of ethnicity.

### **Does a normal test guarantee my child will not have a genetic disorder?**

Screening can reduce, but not eliminate, the chance for some genetic disorder. Because test results can be wrong, it is possible for you to have a child with a genetic disorder even if your and your partner's test results are negative. A false-positive test results when a person tests positive for being a carrier but does not actually have the gene. A false-negative test result is when a person tests negative for being a carrier but actually does have the gene.

### **What can the results of a carrier screening test tell me?**

If both you and your partner are carriers for the same disease, there is a 1 in 4 (25%) chance that the child will get the abnormal gene from each parent and will have the disorder. There is a 50% chance that the child will be a carrier of the disorder, just like the carrier parent.

If only one parent is a carrier, there is a 50% chance that the child will be a carrier of the disorder and a 0% chance that the child will have the disorder.

### **What decisions do I need to make if I am a carrier?**

If you and your partner are both carriers of a genetic disorder, you have several options. You may choose to proceed with becoming pregnant, with the option of considering prenatal diagnosis. You may choose to use in vitro fertilization to create fertilized eggs in the laboratory, followed by preimplantation genetic diagnosis on each of the embryos for the genetic disorder before implanting the embryo into the uterus to achieve a pregnancy. You may also use donor sperm or donor egg to achieve pregnancy. You may choose not to become pregnant.

### **Who should I speak to if I have more questions about preconception carrier screening?**

If you have questions about preconception carrier screening or genetic disorders in general, and especially if there is a family history of a genetic disorder, genetic counseling with a board-certified geneticist is strongly recommended.

#### **References**

Carrier Screening for Genetic Conditions  
<https://www.acog.org/Resources-And-Publications/Committee-Opinions/Committee-on-Genetics/Carrier-Screening-for-Genetic-Conditions>

**Preconception Carrier Screening**

Family Fertility Center offers preconception carrier screening to **all** women of reproductive age. Currently we utilize the following genetic laboratories for preconception carrier screening:

**Counsyl’s Foresight® Carrier Screen** screens for 175 genetic disorders, including cystic fibrosis, fragile X, and spinal muscular atrophy. Counsyl is in-network with most insurance carriers. Some plans cover the cost of this test 100% so there is no cost to you. Some plans may have an out-of-pocket cost due to deductibles and/or copays with an average out-of-pocket cost between \$75 to \$160. Counsyl would notify you by email or text prior to performing the test to advise of your out-of-pocket cost; and you would have an opportunity to decline the testing or elect to pay for the test out-of-network at a fee of \$349. <https://www.counsyl.com/access/>

**Progenity’s Preparent Standard or Global Panel Screen** tests 29 to 200+ hereditary genetic disorders respectively but is **out-of-network for all insurance carriers**. Your insurance company would be billed but, in the event you incur any out-of-pocket expense, you can call Progenity and request your bill be reduced to a self-pay price of \$99. If the female partner is tested positive for one or more of the genetic disorders, Progenity offers testing of the male partner free of charge. <https://www.progenity.com/tests/preparent/preparent-global>

**Natera’s Horizon Carrier Screen** tests up to 274 + hereditary genetic disorders. Natera is in-network with most insurance carriers. Most patients pay less than \$200, many pay zero out of pocket. Natera will run a personalized estimate for in-network patients, those who owe more than \$200 will receive a call and will be offered a pay discount. <https://www.natera.com/in-network-plans> Out of network patients whose coverage is denied in full will pay no more than \$200. Natera also offers pre-implantation genetic testing on embryos for \$99 if both partners are tested positive carriers for the same genetic disorder. Call or email Wally Zebi: [wzebi@natera.com](mailto:wzebi@natera.com) (973)816-3720 for additional questions.

**PLEASE SIGN BELOW TO DESIGNATE WHETHER YOU WISH TO PROCEED WITH PRECONCEPTION CARRIER TESTING OR DECLINE TO UNDERGO SUCH SCREENING:**

<b>Initials</b>	I wish to <b>PROCEED</b> with preconception carrier screening with the genetic test laboratory. <b>Initial to the left and check one genetic laboratory you elect to use.</b>	
	<b>Counsyl*</b>	I understand I shall have 48 hours to decline testing after I have been advised of any costs.
	<b>Progenity*</b>	I understand Progenity will bill my insurance company even though it is out of network; and that I can request my cost be reduced to \$99 whether or not my insurance company makes payment.
	<b>Natera*</b>	I understand Natera will bill my insurance company even though it is out of network; and that my cost can be reduced to \$200 whether or not my insurance company makes payment.
<b>Initials</b>	I wish to <b>DECLINE</b> preconception carrier screening despite being advised of its benefits.	

\*Family Fertility Center has no financial relationship with and does not receive any kick back from any testing company. You have the right to undergo your preconception carrier screening at any laboratory of your choice. The estimated cost is current as of October of 2017. Family Fertility makes no guarantee the cited cost is up-to-date. **It is your responsibility to contact the particular testing company for an exact quote and to find out from your health insurance company your expected out of pocket expense. You are responsible for the cost of any or all of the laboratory or radiologic testing not covered by your insurance.** Family Fertility Center reserves the right to change the testing laboratory without further notice.
