

**CONSENT TO ARTIFICIAL INSEMINATION  
WITH  
SPERM FROM HUSBAND OR SEXUALLY INTIMATE PARTNER**

We, \_\_\_\_\_ and \_\_\_\_\_  
of \_\_\_\_\_ County, City of \_\_\_\_\_ in the state of \_\_\_\_\_ are  
\_\_\_\_\_ (husband and wife or  
domestic partners) and are over the age of twenty-one years. We request and authorize  
Dr. H. Christina Lee and/or such assistants as she may designate to use the services of the  
Family Fertility Center to perform artificial insemination upon  
\_\_\_\_\_ (name of wife or sexually intimate female  
partner) with sperm from \_\_\_\_\_ (name of husband  
or sexually intimate male partner) with the intent of making the female partner pregnant.

The following steps are generally included in this procedure. Dr. H. Christina Lee may add, delete or modify any particular or all steps when deemed medical necessary.

- a. Suitability of the female partner as candidate for this procedure will be determined by standard infertility testing.
- b. Both partners will be offered screening for sexually transmitted diseases.
- c. The female partner will be monitored for optimal timing of insemination. This may require basal body temperature measurement, urine ovulation prediction test, ultrasound examination, blood test, and/or use of fertility medication(s).

We understand that there are risks and discomforts associated with this procedure, including but not limited to:

- a. discomfort associated with the insemination of sperm into the uterus,
- b. risk of infection of the pelvic organs from the insemination procedure, and/or
- c. discomfort with ultrasound and securing blood samples for testing.

We understand that if pregnancy is established that the normal possibility exists of complication during pregnancy and childbirth, e.g. miscarriage, ectopic or tubal pregnancy, stillbirth, congenital abnormalities, and that there is a normal chance of the birth of an abnormal infant or of adverse consequences.

Even if both partners might have been screened for genetic disease and/or sexually transmitted diseases including hepatitis, syphilis and HIV, we understand that it is possible that these tests could be negative despite the possibility of a genetic abnormality or the presence of an infectious agent. We understand that in spite of appropriate and

We accept our obligation to and agree to care for, support and otherwise treat a child or children born as a result of this procedure.
