WELCOME PACKET FOR A MALE INDIVIDUAL

Thank you for choosing the Family Fertility Center for your fertility care. We take great pride in operating as a team to provide quality health care to all of our patients and, ultimately, to help our patients realize their dream of having a child. Included in this packet for **a MALE INDIVIDUAL** are:

- Directions to the Family Fertility Center

- Forms to be completed and brought with you to your appointment:
  -- New Patient Demographics Form
  -- Your Financial Responsibility Form
  -- Pharmacy Benefit Pre-Verification Form
  -- Patient Communication Instructions
  -- Receipt of HIPAA Notice (male)
  -- Insurance Coverage for Laboratory or Radiologic Testing
  -- Preconception Carrier Screening
  -- Questionnaire for Women

- Other documents required at first visit:
  -- Valid drivers' license or state-issued photo ID for both partners
  -- Health insurance cards for both partners
  -- Prescription cards for both partners
  -- Referrals/pre-authorizations as may be required by your insurance, whether primary or secondary. Call the customer service number on your insurance card for assistance in determining if you will need a special referral.

  NOTE: All patients having **Aetna** insurance -- either primary or secondary -- must call the infertility hotline to enroll in the infertility program and/or obtain a pre-authorization. Please call 1-(800)575-5999 to enroll in Aetna's program.

Please take a few minutes to complete these forms, particularly the medical information forms. It is important that you provide as much detailed history as possible to your doctor during your initial consult.

If you already have undergone a basic infertility workup, or if you have had infertility treatment elsewhere, please request copies of those medical records and bring them along to your initial consult. A **Patient Request for Medical Records** form also is available at this website for your convenience.

If your insurance requires any special referrals or preauthorization for infertility, please bring it with you to your initial consultation. Also confirm if ultrasounds and hormone blood tests can be performed in the specialist's office. If not, what is the name of the specific radiology facility or laboratory you must use?

Directions to Our Office
Go to www.familyfertility.com Home page> Becoming a Patient>Schedule a Consultation >Directions to the Family Fertility Center.

FAMILY FERTILITY CENTER **www.familyfertility.com**

Bethlehem, PA 18017 Fax (610) 868-8700

Keeping your appointment

Last minute delays or schedule conflicts happen. Our team will greatly appreciate a courtesy call to keep us informed. We will give our best effort to accommodate reasonable delays or we will be glad to reschedule your consultation at another mutually convenient time.

Your First Visit

At your first visit, a careful review of the woman's medical history including past and current health condition will be undertaken. This can include:

- A review of the pattern of menstrual cycle and bleeding to help determine if ovulation is occurring and if other problems such as diminished reserve (aging) of the ovary or uterine defects (fibroids or polyps) are present.
- A review of past pregnancies and outcome.
- Collection of information which might suggest an anatomic problem with the tubes, such as questions about past history of sexually transmitted infections, painful periods or intercourse, and/or a previous abdominal surgery.
- Questions about prior freezing or surgery to the cervix for abnormal pap smears.
- A general review of systems to ascertain symptoms suggestive of other endocrine abnormalities which might be contributing to infertility.
- A careful social history to evaluate for any environmental exposures or social habits (such as smoking, drinking alcohol, drug usage or extreme exercise) which could contribute to the infertility.
- A detailed family history to identify possible familial diseases such as uterine fibroid, diabetes, thyroid disease, ovarian cancer and breast cancer.

A physical examination, a pelvic ultrasound, and/or hormone blood tests may be performed at your first visit to evaluate the pelvic organs and assess potential hormonal problems. In some cases, your insurance may require you to have these tests performed at an outside facility. Also please check with your insurance to determine if any special referrals or authorizations are required if these tests are performed in our office.

Any medical records you may have related to previous infertility evaluation or treatment will be reviewed to define the cause of your infertility, evaluate the effectiveness of past treatment and, assess how that information may impact your future treatment options.

We look forward to meeting you. Should you have any questions in the meantime, please feel free to call our office at (610)868-8600.

Thank you.

YOUR FINANCIAL RESPONSIBILITY

Having insurance is not a substitute for payment. Family Fertility Center (FFC) cannot guarantee payment of claims by your insurance company. At all times, patients are responsible to advise FFC of any changes in insurance coverage. You are responsible for knowing the terms of your benefit plan and making sure all action is taken by you in order to ensure optimal reimbursement, including, but not limited to, obtaining referrals and/or pre-authorizations, appealing denials, etc.

If FFC participates with your insurance plan, claims for covered services will be submitted directly to your insurance. You are responsible for paying all current and outstanding co-pay, co-insurance, and deductible amounts at each date of service. Failure to pay for treatments rendered and/or any outstanding balances may result in further treatment being postponed or terminated. It is the patient's sole responsibility to appeal any denied charges. Payment for any denied charges, regardless of rejection reason or appeal status, is due within 30 days of receiving your insurance Explanation of Benefits (EOB) or FFC statement.

If FFC does not participate with your insurance plan, or if services are not covered under your insurance plan, you will be responsible for paying all charges prior to services being rendered by FFC. Discounted fee packages are available for patients with no insurance coverage for treatment; payment plans are not available.

Any unpaid patient balances remaining after 90 days for any reason will be forwarded to an outside agency for collection and/or may be reported to the Credit Bureau as a bad debt without further notice to you. Any and all costs incurred (attorney fees, collection expenses of 33.3%, etc.) to collect any unpaid balances will be owed by you.

FFC participates in Northampton County Bad Check Restitution Program. For each check returned due to non-sufficient funds (NSF), a $50 service fee will be charged to you. Failure to pay the amount of NSF check and service fee within 10 days after receiving written notice by FFC will result in a Bad Check Crime Report being filed with the Bad Check program. You will incur additional costs and/or be prosecuted by the District Attorney's office.

We reserve our right to waive payment in the event of financial hardships or based on individual consideration. Any payment waiver and/or reduction will be made at our sole discretion and is not to be construed as an agreement or contract to reduce/waive any or all fees.

I/WE, THE UNDERSIGNED, HAVE READ THIS INFORMATION, UNDERSTAND IT, AND AGREE TO BE FINANCIALLY RESPONSIBLE IN ACCORDANCE WITH THE TERMS SET ABOVE. I/WE ALSO AUTHORIZE FAMILY FERTILITY CENTER TO CHARGE MY/OUR CREDIT CARD, AS MAY BE REQUESTED BY PHONE, FOR ONE-TIME AGREED-UPON PAYMENTS. I/WE UNDERSTAND CREDIT CARD INFORMATION WILL NOT BE SAVED FOR FUTURE TRANSACTIONS.

Insurance Coverage for Laboratory or Radiologic Tests

What are laboratory or radiologic tests?
Laboratory tests typically involve blood test, urine analysis or test on tissue biopsy. Most common radiologic tests are X-ray, ultrasound, CAT scan or MRI.

Why are laboratory or radiologic tests necessary?
Laboratory and radiologic tests are necessary to screen you for certain disorders you are at risk for, to find out why you have certain symptoms, and to evaluate if you respond well to a particular treatment.

What tests are ordered for me?
Family Fertility Center follows prevailing standards of care regarding what tests are medically indicated for males planning to have a child using donor eggs. These include but are not limited to screening for general health such as complete blood count, thyroid hormone, blood glucose, sexually transmitted diseases, STD, including HIV; preconception carrier screening for cystic fibrosis and other genetic diseases; and genetic disease testing and chromosomal analysis for certain medical conditions.

Does my health insurance cover the cost of laboratory or radiologic tests?
Even though a test is medically indicated and recommended by prevailing standards of care, it may or may not be covered by your insurance. Family Fertility Center makes no guarantee that your insurance will cover any test.

Can Family Fertility Center find out for me if a laboratory or radiologic test is covered by my insurance?
Your health insurance is a contract between you and your insurance company. It is your responsibility to contact your insurance company to find out whether a particular test is covered by your policy and how much you should expect to pay.

What should I do if I am concerned the test is not covered by my health insurance?
You must voice your concern to the staff at the Family Fertility Center and request to opt out any or all of the medically indicated tests **BEFORE** the test is performed.

PLEASE INITIAL NEXT TO YOUR CHOICE AND SIGN BELOW TO INDICATE WHETHER YOU WISH TO PROCEED WITH OR OPT OUT OF ANY OR ALL LABORATORY OR RADIOLOGIC TESTING

[ ] I agree to **PROCEED** with laboratory and radiologic testing as indicated by prevailing standards of care*. I understand I am responsible to contact my insurance company to find out if a particular test is covered by my insurance policy and my expected out of pocket expense.

[ ] I wish to **OPT-OUT OF ALL** medically indicated laboratory and radiologic testing until further notice. I understand by declining laboratory and radiologic testing, my medical care is compromised because such tests are necessary to screen for certain diseases I am at risk for, to find out why I have certain symptoms and/or to evaluate if I am responding well to a particular treatment.

[ ] I wish to **OPT-OUT OF ONLY THE TEST WRITTEN BELOW** until further notice. I understand by declining laboratory and radiologic testing, my medical care is compromised because such test is necessary to screen for certain diseases I am at risk for, to find out why I have certain symptoms and/or to evaluate if I am responding well to a particular treatment.

Name of laboratory or radiologic test opting out _____

*Family Fertility Center makes no guarantee any or all of the laboratory or radiologic testing is covered by your insurance company in spite of prevailing standards of care. **It is your responsibility to contact your insurance company to find out whether a particular test is covered and your expected out of pocket expense. You are responsible for the cost of any or all of the laboratory or radiologic testing not covered by your insurance.**

Patient Signature: _____ **Date:** _____

Preconception Carrier Screening

Modified in part from ACOG: Preconception Carrier Screening
https://www.acog.org/patient-resources/faqs/pregnancy/carrier-screening

What is preconception carrier screening?
Preconception carrier screening is a type of genetic test you can have before pregnancy that can tell whether you carry a gene for certain genetic disorders. It allows you to find out the chances of having a child with a genetic disorder.

What is a carrier?
For some genetic disorders, it takes two genes for a person to have the disorder. A carrier is a person who has only one gene for the disorder. Carriers have no or mild symptoms but can pass on the gene for that disorder to his or her child.

Who should have carrier screening?
All people who are thinking about having a child are offered carrier screening for cystic fibrosis, thalassemia, hemoglobinopathies, and spinal musclar atrophy. You can have screening for additional disorders as well. There are two approaches to carrier screening for additional disorders: 1) targeted screening and 2) expanded carrier screening.

What is targeted carrier screening?
In targeted carrier screening, you are tested for disorders based on your ethnicity or family history. If you belong to an ethnic group or race that has a high rate of carriers for a specific genetic disorder, carrier screening for these disorders may be recommended. This also is called ethnic-based carrier screening. If you have a family history of a specific disorder, screening for that disorder may be recommended, regardless of your race or ethnicity.

What is expanded carrier screening?
In expanded carrier screening, many disorders are screened for using a single sample. This type of screening is done without regard to race or ethnicity. Companies that offer expanded carrier screening create their own lists of disorders that they test for. This list is called a screening panel. Some panels tests for more than 100 different disorders. Screening panels usually focus on severe disorders that affect a person's quality of life from an early age.

Is one approach better than the other?
As of 2017, the American College of Obstetricians and Gynecologists (ACOG) recommends either approach is acceptable. But for individuals with a specific family history or ethnicity for certain genetic disorder, a targeted carrier screening would be more appropriate.

Do I have to have carrier screening?
Carrier screening is a voluntary decision. You can choose to have carrier screening or not. There are no right or wrong choices.

How is carrier screening done?
Carrier screening involves testing a sample or blood or saliva. The sample is sent to a laboratory for testing. Often the partner who is most likely to have a defective gene is tested first. If test results show that the first parnter is not a carrier, then no additional testing is needed. If test results show that the first partner is a carrier, the other partner is tested.

Does preconception carrier screening test for all genetic disorders? What carrier screening tests are available?
Carrier screening tests do not detect all genetic disorder. Carrier tests are available for a limited number of diseases, including cystic fibrosis, fragile X syndrome, sickle cell disease, and Tay-Sachs disease. As of 2017, the American College of Obstetricians and Gynecologists (ACOG) recommends carrier screening for cystic fibrosis, spinal muscular atrophy, thalassemia and hemoglobinopathies be offered to all people who are considering pregnancy or are already pregnant regardless of ethnicity.

Does a normal test guarantee my child will not have a genetic disorder?
Screening can reduce, but not eliminate, the chance for some genetic disorder. Because test results can be wrong, it is possible for you to have a child with a genetic disorder even if your and your partner's test results are negative. A false-postivie test results when a person tests positive for being a carrier but does not actually have the gene. A false-negative test result is when a person tests negative for being a crrier but actually does have the gene.

What can the results of a carrier screening test tell me?
If both you and your reproductive partner are carriers for the same disease, there is a 1 in 4 (25%) chance that the child will get the abnormal gene from each parent and will have the disorder. There is a 50% chance that the child will be a carrier of the disorder, just like the carrier parent.
If only one parent is a carrier, there is a 50% chance that the child will be a carrier of the disorder and a 0% chance that the child will have the disorder.

What decisions do I need to make if I am a carrier?
If you and your partner are both carriers of a genetic disorder, you have several options. You may choose to proceed with becoming pregnant, with the option of considering prenatal diagnosis. You may choose to use in vitro fertilization to create fertilized eggs in the laboratory, followed by preimplantation genetic diagnosis on each of the embryos for the genetic disorder before implanting the embryo into the uterus to achieve a pregnancy. You may also use donor sperm or donor egg to achieve pregnancy. You may choose not to become pregnant.

Who should I speak to if I have more questions about preconcpeption carrier screening?
If you have questions about preconception carrier screening or genetic disorders in general, and especially if there is a family history of a genetic disorder, genetic counseling with a board-certified geneticist is strongly recommended.

Preconception Carrier Screening

Family Fertility Center recommends and offers preconception carrier screening to **all** people of reproductive age planning to have a child with his/her gamete (sperm or egg). Currently we utilize Natera® (www.natera.com) for preconception carrier screening.

Natera® Horizon Carrier Screen tests up to 274 hereditary genetic disorders. https://www.natera.com/womens-health/horizon-advanced-carrier-screening Natera® is in-network with many insurance carriers including Capital Blue Cross, Blue Shield (PPO), St. Luke's Hospital, Cigna, Keystone Central, and some Geisinger and Aetna plans. Natera® will run a personalized estimate and contact you regarding your out-of-pocket expense. The average out of pocket expense is around $250 in 2024. Further information about insurance coverage for Natera Horizon Carrier Screen is available at https://www.natera.com/womens-health/pricing-billing Natera® offers discount for qualified individuals with its compassionate care program. See https://natera.showpad.com/share/M9LjD8QRUNiqabRam8vnU for more details.

If you decide to proceed with preconception carrier screening with Natera®, we will place an online order with Natera® for you. Natera® will send you an email, a text or a phone call regarding your carrier screening test. **You must respond in order to make arrangement to collect a blood sample from you.** Go to https://my.natera.com/services/blood_draw to find a lab near you.

The turnaround time is about 14 to 21 days. Natera® will notify you by email, text or phone call when your result is available. You can check on the patient portal at https://my.natera.com/ for your test results. Natera® will also send a copy of your carrier screen results to us, the ordering physician. If the test is positive, your reproductive partner must be tested for carrier screen as well. Natera® offers one free session of genetic counseling with a board-certified genetic counselor regardless of your carrier screen results. Natera® also offers pre-implantation genetic testing on embryos at a discounted price if both partners are tested positive carrier for the same genetic disorder.

PLEASE SIGN BELOW TO INDICATE WHETHER YOU WISH TO DECLINE OR PROCEED WITH PRECONCEPTION CARRIER TESTING:

I have been advised and offered to undergo pre-conception carrier screening. The benefits, risks, limitations and cost of carrier screening have been explained and understood by me. I voluntarily decide to **DECLINE** any preconception carrier screening.	**Signature** **Date**
I have been advised and offered to undergo pre-conception carrier screening. The benefits, risks, limitations and cost of carrier screening have been explained and understood by me. I understand I have the right to undergo my preconception carrier screening at any laboratory of my choice. I agree to **PROCEED** with preconception carrier screening with *Natera®.	**Signature** **Date**

* You are free to choose any genetic laboratory other than Natera® to perform your carrier screening. Family Fertility Center has no financial relationship with, and does not receive any kick back from any company including Natera®. The estimated cost is current as of Jan 10, 2024. **Family Fertility makes no guarantee the cited cost is up-to-date. It is your responsibility to contact Natera® for an exact quote and to find out from your health insurance company your expected out of pocket expense. You are responsible for the cost of any or all of the laboratory testing not covered by your insurance.** Family Fertility Center reserves the right to change the testing laboratory without further notice.
